

~Quality Products and Service Since 1952~

Featuring a 4 1/2" frame, Champion's Series 5045 Casement/Projected Window provides an alternative to Champion's 5000 Series 2 1/2" frame projected and casement products, as well as its 8000 Series structurally-glazed casement window wall. The 5045 is a fully thermally-broken window, and features beveled sashes as well as a heavy-duty cam handle. Champion has a wide array of options available with the 5045, all of which provide the window with the versatility necessary to be utilized in many different applications. The Champion 5045 Casement/Projected Window is the perfect solution for all new construction and rehabilitation jobs.
